

Dear Colleagues,

We are proud to announce the 2nd International Interdisciplinary Course for Microscopic and Endoscopic Surgery of the Anterior and Lateral Skull Base in Erlangen, organized by the Department of Otolaryngology - Head and Neck Surgery and the Department of Neurosurgery at the University Hospital Erlangen.

The anatomic region of the skull base is complex and poses surgical challenges for otolaryngologists and neurosurgeons alike. To treat the various conditions that can affect the skull base, a highly specialized set of surgical procedures is needed. In most cases, lesions lie in close proximity to vital structures what makes skull base surgery very challenging.

In up to 18 hours practical training over three days, we will give you the opportunity to gain excellent knowledge about skull base anatomy and the different kinds of approaches. We would like to give you the chance to learn from experienced colleagues and to expand your knowledge beyond your own specialty.

We are looking forward to seeing you in Erlangen!

Sincerely yours,

H. Iro, Prof., ENT, Erlangen

A.-O. Gostian, MD, PhD, ENT, Erlangen

S.-M. Schlaffer, MD, Neurosurgery, Erlangen

R. Rupp, MD, ENT, Erlangen

Wednesday February 19th, 2020

08.00 Registration

08.15 Welcome and Introduction

08.30 Anatomy/Imaging of the Anterior Skull Base

09.15 Surgery of the Anterior Skull Base - the Rhinosurgeon's view

09.45 Hands-on Course Part I

12.00 Lunch

13.00 Transfacial Approaches to the Anterior Skull Base

13.30 Surgery of the Anterior Skull Base - the Neurosurgeon's view

14.00 Interdisciplinary Approaches to the Orbit

14.30 Hands-on Course Part II

18.30 End of first day

Thursday February 20th, 2020

08.15 Pituitary Surgery

08.45 Approaches to the Optic Nerve

09.30 Hands-on Course Part III

12.00 Lunch

13.00 Anatomy and Imaging of the Lateral Skull Base

13.45 From Mastoidectomy to Petrosectomy

14.15 Translabyrinthine/Transcochlear Approach to the Internal Auditory Canal

14.45 Hands-on Course Part IV

18.30 End of second day

20.00 Course dinner

Friday February 21st, 2020

08.15 Retrosigmoid Approach, Posterior Fossa

09.00 Middle Fossa Approach

09.30 Hands-on Course Part V

12.00 Lunch

13.00 Complications in Skull Base Surgery/ Management of Liquorrhoea

14.00 Case presentation/Open discussion: Faculty, Participants

14.30 Hands-on Course Part VI – the approach you always wanted to do

17.30 End of Course

This preliminary program is subject to change.
