20th International Course on Diagnostics and Surgery of Salivary Gland Diseases in Consideration of Minimal Invasive Techniques

October 23th – 26st, 2024
Department of Otorhinolaryngology –
Head and Neck Surgery

Institute of Anatomy

Gesellschaft für Ärztliche Fortbildung e.V.
an der Hals-Nasen-Ohrenklinik, Kopf- und Halschirurgie

Dear colleagues,

We are pleased to announce our 20th international course and workshop on salivary gland diseases together with well known specialists in this field.

Course lectures will cover basics, state of the art procedures and are furthermore focused mainly on the practical lessons. The course is suited not only for residents getting a “hands on” experience in salivary gland diagnosis and therapy, but also for experienced surgeons to learn more about the most recent advances in diagnostics and therapy. Besides continuing medical education, the course is designed to encourage the exchange of experience in a personal ambience. Due to the growing interest, the course is also focused on the development of minimally invasive surgical techniques and procedures.

The intended limited number of participants will have the opportunity to perform all established operative procedures of salivary gland surgery (cadaver dissection), to train in sialendoscopy under almost real conditions (fresh frozen cadavers) and to learn microsurgical techniques (rat model). By visiting the operating rooms and arrangements of our department for live surgery/procedures and the Institute of Anatomy (Head: Prof. Dr. Bräuer) with its excellent equipment, individual teaching by the team of experts is provided.

We are looking forward to meeting you in Erlangen!

Heinrich Iro

Programme

Wednesday, October 23th, 2024

- 08.00 **Registration, welcome and introduction**
- 08.45 **X-ray, CT- and MRI-scans in diagnosis of salivary gland diseases**
- 09.15 **Sonographic anatomy and ultrasound of salivary gland diseases**
- 09.45 **State of the art in invasive ultrasound-guided diagnostics and frozen section by salivary gland tumors**
- 10.30 **Sialolithiasis**
- 12.30 **Lunch**
- 13.15 **Sialolithiasis: Navigation and Robotic assisted surgery**
- 13.45 **Management salivary duct stenosis**
- 14.15 **Sialendoscopy in inflammatory/non-obstructive diseases**
- 15.00 **Workshop: endoscopes, instruments, techniques**

Thursday, October 24th, 2024

- 07.45 **Surgery, hands-on course**
- 12.00 **Lunch**
- 13.00 **Histology and histopathology of benign salivary gland diseases**
- 13.30 **25 years of reduced surgical invasiveness in parotid surgery: What we have learned**
- 14.15 **Treatment of tumors in the paralaryngeal space: Decision-making and long-term experience**
- 14.45 **Diagnostic approach and strategy in the treatment of recurrent pleomorphic adenoma**
- 15.35 **The Role of RT in recurrent pleomorphic adenoma**
- 16.00 **"Warthin´s lesion"**
- 16.30 **Complications after Parotidectomy with emphasis on fistula and first bite syndrome**
- 16.55 **Botulinum Toxin in salivary gland diseases**
- 17.25 **Histopathology and molecular biology of malignant salivary gland tumors in consideration of the current WHO classification**
- 19.30 **Course Dinner**

Friday, October 25th, 2024

- 07.45 **Surgery, hands-on course**
- 12.00 **Lunch**
- 13.10 **Adenoidcystic carcinoma: specificities in diagnostics and management**
- 13.40 **Minor salivary gland lesions: Personal experience, state of the art and literature review**
- 14.20 **Surgical approach to the primary tumor and facial nerve in malignancies of the parotid gland**
- 15.00 **Management of the neck in salivary gland carcinomas in consideration of new aspects and developments**
- 16.00 **Clinical prognostic factors in primary salivary gland malignancies**
- 16.30 **Targeted therapy of salivary gland carcinoma: new developments and trends**
- 17.00 **Radiotherapy and systemic therapy for primary salivary gland malignancies**
- 17.30 **Reconstruction and rehabilitation of the facial nerve after ablative surgery in parotid carcinoma**
- 18.00 **Reconstruction of defects after surgery of the of the parotid gland and peri-parotideal region**

Saturday, October 26st, 2024

- 08.00 **hands-on course (Institute of Anatomy) Sialendoscopy/cadaver dissection**
- 14.00 **End of course**
