Facial Plastic Surgery April 17 – 20, 2018

**Universitätsklinikum
Erlangen**

Dear Ladies and Gentlemen, Dear Colleagues!

The 14th International Erlangen Course in Facial Plastic Surgery from **April 17 – 20, 2018** will now continue the program of our previous course on “Septum Surgery and Principles in Rhinoplasty”. Based on these contents it is our main goal to illustrate the modern and innovative techniques in rhinoplasty in detail. We are convinced that **high quality instructional video clips** can provide a greater variety of different surgical techniques and lead to a more interactive discussion than conventional live surgery.

This time the course will be completed by the topic “**Otoplasty**”. In addition to step-by-step demonstrations of contemporary and approved surgical techniques we will present our concepts in revision surgery, different approaches in minor malformations and reconstructions.

The participants subsequently will have the opportunity to apply their new surgical skills during the dissection course on **fresh frozen specimens** under personal guidance of the faculty members. As supplement to the dissection manual an **e-Book** containing a great number of instructional video clips dealing with septum surgery and the principles in rhinoplasty will be **available**.

We hope that the program of the 14th International Erlangen Course in Facial Plastic Surgery will pique your interest, and we are looking forward to welcoming you in April, 2018!

Yours sincerely,

Prof. Dr. med. Jochen Wurm

Prof. Dr. med. Dr. h. c. Heinrich Iro
